

1.2 The RISC OS Simulator

The RISC OS simulator is a software program that allows you to run RISC OS software on a PC. It is a full-featured emulator that can run any RISC OS software that is compatible with the RISC OS 3.51 kernel. The simulator is designed to be as accurate as possible, so that you can run your RISC OS software on a PC without any loss of functionality.

The simulator is a full-featured emulator that can run any RISC OS software that is compatible with the RISC OS 3.51 kernel. It is designed to be as accurate as possible, so that you can run your RISC OS software on a PC without any loss of functionality.
